PREPAID PRICES

We guarantee all bulbs to be true to name, up to size and free of disease and insect pests. We try to be very generous with overcount and extras. All stock has passed a very rigid examination by Wisconsin State Dept. of Agriculture.

With the issuing of this new price list, we are notifying the Glad public of a change in our mailing address. We have selected a large farm with plenty of acreage, with that very desirable light sandy soil. To give you the finest bulbs that it is possible for us to grow.

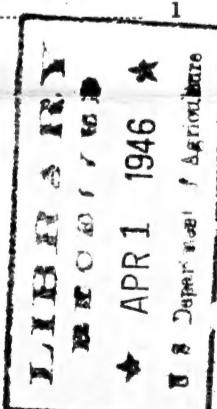

A large catalog was prepared, with something new for Glad fans, but certain economic difficulties make it impossible to complete it. This shorter price list has to be substituted. We hope that it is not too late. We have a nice lot of bulbs. All bulblets and smaller sizes, and some of the very early varieties will be withdrawn for April planting, on April 1st. PLEASE place your order before that time.

All stock grown on ground that has never before grown Glads. All bulbs grown under first class field conditions. No 'high pressure' methods are used to get exhibition bloom. You will be very pleased with the quality of our bulbs. No substitution of varieties will be made unless requested.
